EDUCATION

Central South University | Project 985 University | China Sep. 2023 – Jun. 2027

- **Bachelor in Product Design** • **GPA:**87.55/100 (**Ranking:**23/148)
- **Core Courses:**Information and Communication Design(93),Computer-Aided Industrial Design(90),Digital Image Technology
- **Research Interests:**HCI, HAI, Multimodal Interaction, User Research, Social Computing, and Computer Graphics.
- **Skills:**User research, problem framing, data analysis, interaction prototyping, AI/LLM-assisted development, literature review, and academic writing; Figma, Adobe Creative Suite, Python, SQL, SPSS, Prolific, LaTeX/Overleaf, and Zotero.

RESEARCH EXPERIENCE

Studio for Narrative Spaces | City University of Hong Kong May. 2026 – Present

Research Assistant | Advisor: Prof. Ray LC

- Contributed to a CHI-oriented social computing project on AI tool identities and psychological affordances, examining how creative practitioners perceive capability boundaries and coordinate multiple GenAI tools in creative workflows.
- Supported formative study design through semi-structured interviews and workflow walkthroughs, focusing on tool selection, switching, combination, and team-based GenAI practices across creative tasks.
- Helped develop the qualitative analysis plan using open coding, thematic analysis, and affinity diagramming to synthesize users' mental models, coordination breakdowns, and design opportunities for paper framing.

RESEARCH PROJRCTS

Explainable GATv2-Based Human-AI Decision Support System for Cardiovascular DDI Prediction

Project Leader | Advisor: Prof. Xiaowen Xu Dec. 2025 – May. 2026

GATv2, PyTorch, FastAPI, SQLite, HTML/CSS/JavaScript, OCR, Qwen API, DDI graph modeling, explainable AI interface design

- Led the design of a human-AI decision-support system for drug-drug interaction prediction, translating GATv2 model outputs into patient- and clinician-facing risk visualizations, explanations, and intervention suggestions.
- Coordinated data cleaning, local model training, and web prototype development to build an end-to-end explainable AI system.
- Led project coordination, literature review, and research writing to ground the system in DDI prediction, GNNs, and intelligent healthcare interaction.

Research on Interactive Game System Design for Intergenerational Relationships

Project Leader | Advisor: Assoc. Prof. Simian Liu Mar. 2024 – Apr. 2025

Semi-structured interviews, contextual observation, open coding, thematic analysis, affinity mapping, usability testing

- Led a family HCI study using interviews, contextual observation, open coding, and thematic analysis to investigate communication gaps and emotional connection needs in intergenerational caregiving families.
- Derived design principles from qualitative findings and built a multi-agent system with a TV collaborative game, child wristband, elder controller, and parent-facing app.

PUBLICATIONS & PATENTS

- **Wenjie Tang**, He Zhou, Kang Wang, Ziru Zhang. (2026). A Feature-Attentive GATv2 Framework for Drug-Drug Interaction Prediction. Proceedings of ISEAE 2026, IEEE Xplore, EI Compendex indexed.
- Shaoge Wang, Shengnan Wu, **Wenjie Tang**. (2025). Research on behavioral intervention product design for infantile anorexia based on the FBM model. Design, 21(4), 312–330. CN11-5127/TB, ISSN 1003-0069.
- **Wenjie Tang**. Intelligent Early-Warning System for Cardiovascular Multi-Drug Interactions. China Invention Patent Application, Application No. 2026105600993, filed Apr. 27, 2026. Patent pending.
- **Wenjie Tang**. Children's Motion Capture Wristband. China Design Patent, No. 202630146813.5, authorized Apr. 8, 2026.

INTERNSHIP EXPERIENCE

Xiaomi Corporation Nanjing, China

Product Management Intern | Internet Services Division Jun. 2025 – Sep. 2025

- Conducted user research and competitive analysis for an AI reading-assistant Agent, producing 10 reports and 3 PRDs on content understanding, summarization, and user follow-up interactions.
- Designed A/B experiments for intelligent notifications and personalized engagement, using behavioral data to optimize interaction flows and targeting strategies.

Mango TV Changsha, China

AIGC Intern | Intelligent Research Center Sep. 2025 – Dec. 2025

- Supported the training and iterative refinement of “Shanghai,” an in-house GenAI model for historical film and television content generation, evaluating outputs on visual quality, style consistency, and cultural-semantic accuracy.
- Contributed to the optimization of human-AI creative workflows for historical costume, makeup, and prop generation.

HONORS & AWARDS

2 National Awards, 10 Provincial Awards, 6 Individual Honors, and 4 Provincial/National Grants

Across technology, design, innovation, and social practice

- **Selected Awards:** National Silver Medal, 14th Challenge Cup(Top 0.21%); National Third Prize, 2026 Milan Design Week Competition(Top 0.6%); Provincial First Prize, 2026 China University Students Computer Design Contest(Top 10%);
- **Selected Grants:** 2026 National Undergraduate Innovation and Entrepreneurship Training Program Grant(RMB 20,000); 2025 Provincial Undergraduate Innovation and Entrepreneurship Training Program Grant(RMB 10,000).
